Perkins. 1642.

A Prognostication for the yeere of our Lord God, 1642.

Being the second after Bissextile or *Leap-yeare*, and from the Worlds Creation, 5605.

Wherein is contained the description of the foure quarters of the yeere: As also a Chronologicall Table of many things worth remembrance, since the Creation, untill this present yeere 1642 collected for the most part, out of Ecclesiasticall History, and other good Authors, something augmented.

By SAMUEL PERKINS, Well-willer to the Mathematicks.

The eighteenth Edition.

Printed at *London* by *I. Raworth* for the Company of Stationers, 1642.

A Deſcription of the Foure Quarters of the Yeare, and firſt of Winter.

☉ in ♑ ♒ ♓

ACcording to the cuſtome of writers in this kind, Winter Quarter is the firſt Quarter, which toke beginning the 12 day of December, 1640. at which time the Sun entred into the firſt degree of the cold and dry ſigne Capricorne, being the moſt remote from us in his farthest South declination, cauſing the dayes with us to be ſhorteſt, and the nights longeſt: Which Quarter continuing untill the Sun hath ſlowly paſſed through Capricorne, Aquarius, and Pisces. This Quarter doth naturally reſemble Old age.

Of the Spring.

☉ in ♈ ♉ ♊

THis Quarter doth take beginning the 10 of March, at which time the Sun entreth into the firſt minute of Aries, and doth continue whilſt the Sun is paſſing through theſe 3 vernall ſignes, Aries, Taurus, and Gemini. This Quarter doth reſemble growing youth.

Of Summer.

☉ in ♋ ♌

The Summer Quarter doth take his beginning when the Sunne doth enter into the first degrée of Cancer, which will be this yéere the 12 of June, and doth continue whilest the Sunne passeth through Cancer, Leo, Virgo, now are the dayes longest, and the ayre hottest, therefore, but for necessity, bid Physicke Adieu.

Of Autumne.

☉ in ♎ ♏ ♐

Autumne or Harvest Quarter (commonly called the Fall of the Leafe, of some the Latter Spring doth begin when the Sun doth enter into the first degrée of Libra, making againe the day and the night of equall length: Which will be this peare, the 13 of September, and doth continue whilest the Sun doth passe through Libra, Scorpio, and Sagittarius. This quarter doth fitly resemble declining age and Phlegmatick complexion.

A briefe Chronologicall Description of many things worthy of memory, that have hapned since the Creation unto this present yeere of our Lord 1642. with the yeere of the World in which they hapned, in the first Columne, faithfully collected from many good Authors.

	Shrewsbury	20	

There is another way to go to Shrewsbury from Briſtow, as to Gloceſter, Tewkesbury, Worceſter and Bridgenorth, &c. but it is 17 miles further, and then you paſſe no Ferry.

Of the Eclipſes this yeere 1642.

OF foure Eccliples, two of the Sunne, and two of the Moone, we ſhall ſee but only thoſe of the Moone, one on the 4. of Aprill, about 1. at night, and the other on the 27. of September, at 3. a clocke that night.

FINIS.
